# Checklist before running Jupyter Source File
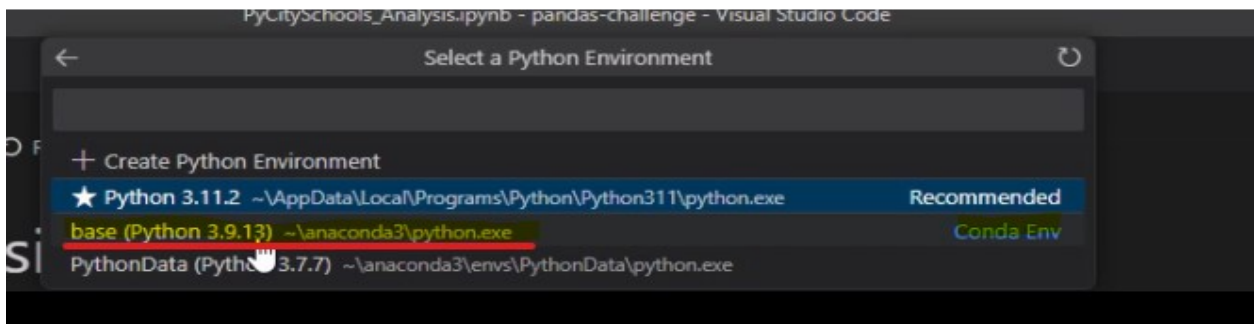

I.   KERNEL SELECTION

Click on 'SELECT KERNAL' on the right side of the screen

Select Python Environments

Then click Condo Env (\anaconda3\python.exe)

After selected ensure Python kernel listed like below

II.   DATA SET FOLDER VERIFICATION

1. Ensure required data folder and "pymaceuticals_analysis" Jupyter Source File are placed in the same level as highlighted and shown below.
   a.   DATA FOLDER
   b.   PYMACEUTICALS_ANALYSIS.IPYNB (JUPYTER SOURCE FILE)

> Desktop > UTBootCamp > GitHubRepo > matplotlib-challenge   ∨   C   Search matplotli

Name	Status	Date modified	Type
.ipynb_checkpoints	✅	4/3/2023 1:33 PM	File folder
data	✅	4/3/2023 1:33 PM	File folder
pymaceuticals_analysis	✅	4/3/2023 10:25 AM	Jupyter Source File
README	✅	4/3/2023 1:31 PM	Markdown Source...

2. Ensure the below 2 data files are present inside the data folder. d
   a.   MOUSE_METADATA.CSV
   b.   STUDY_RESULTS.CSV

> UTBootCamp > GitHubRepo > matplotlib-challenge > data   ∨   C   Search data

Name	Status	Date modified	Type	Size
Mouse_metadata	✅	4/2/2023 8:14 PM	Microsoft Excel C...	8 KB
Study_results	✅	4/2/2023 8:14 PM	Microsoft Excel C...	40 KB
